

Markets & Economics Quantitative Analyst (Duration: 12 months)

Vancouver, BC

About FPInnovations

FPInnovations is among the world's largest private, non-profit forest research centres. The organization helps the Canadian forest industry to develop ground-breaking solutions based on the unique attributes of Canada's forest resources, favouring a sustainable development approach and taking full advantage of the industry's considerable scientific, technological and commercial capital.

To serve its members and customers, the Sustainable Construction Innovation Centre of Excellence works with a variety of construction stakeholders, industry partners, associations and governments. The construction metrics group produces market intelligence, economic analyses, and business development tools for building products and systems aimed at homebuilders, distributors, architects, engineers, and consumers.

Description

The Quantitative Analyst plays a central role in managing the process of data collection, modelling, and analysis for the group. They assist in further developing and maintaining internal databases and construction market models. Further, the Quantitative Analyst will be responsible for building queries and reporting from these tools.

Responsibilities

- Data management – managing the process of data collection and analysis;
- Create and maintain databases and modelling tools (trade, building systems, demographics, and economics);
- Create and report upon custom queries from quantitative tools;
- Carry out detailed market analysis and prepare project reports.

Qualifications

- Post-secondary education in a related field;
- Intermediate to advanced Tableau and/or Power BI skills;
- Data management and reporting skills mandatory;
- Experience in wood products, building materials, or construction an asset;

- Cost Analysis, Quantity Appraisal, Statistics and Forecasting are assets.
